American Society of PeriAnesthesia Nurses™ (ASPAN®)

A Competency Based Orientation and Credentialing Program for the Unlicensed Assistive Personnel in the Perianesthesia Setting – 2017 Edition. (UAP CBO)

Copyright © 2017. ASPAN. All rights reserved. Reproduction or transmission of the materials by any means, electronic, mechanical, or otherwise, in whole or in part, without the prior written consent of the copyright holder (ASPAN) is a violation of copyright law.

All material in the 2017 UAP CBO book is, unless otherwise stated, the property of ASPAN. Copyright and other intellectual property laws protect these materials. Users may not distribute copies to others, other than as listed below, whether or not in electronic form, whether or not for a fee or other consideration, without prior written consent of the copyright holder of the materials.

ASPAN's competency-based orientation program, either print version or USB flash drive, was intended for a facility to include in its unit-based orientation program.

ASPAN's standard permission is given to make photocopies of the chapter text material or retype material from the chapters to be incorporated into a printed competency program within user's hospital only (**not a multi-hospital system**), and hard copies distributed to nurses within user's own particular facility.

User/facility may not make scanned or electronic copies of the .pdf files or save .pdf files to other USB drives, computers or hard drives for distribution. No part of the publication is permitted to be e-mailed.

ASPAN grants permission to load **chapter test questions, answers and competency grids** from its competency-based orientation programs on an e-learning system, intranet, shared internal website or other types of catalog systems only within one particular facility (multi-hospital systems require ASPAN's written permission to do so). The **chapter text material itself is NOT permitted to be uploaded** to any e-learning system, intranet, shared internal website or catalog system, regardless of security measures and firewall protection.

For information on an unrestricted licensing program, contact aspan@aspan.org.

The competency-based orientation program is not interactive media, but texts of core competencies developed by perianesthesia experts for the purpose of guiding clinical orientation to perianesthesia practice. In addition, the competency-based orientation programs have not been pilot tested nor approved for awarding continuing educational contact hours and, therefore, cannot be utilized in this manner.

Please credit ASPAN with authorship (required). User may not utilize material from the competency-based orientation programs in any printed or electronic matter that would be published for user or institution's financial gain. ASPAN's preferred citation:
