Outline

I. Introduction
II. Pathophysiology of Pain
   a. Peripheral
   b. Spinal
   c. Supraspinal
III. General Practice Guidelines
IV. General Postoperative Pain Management
   i. Nonpharmacological
   ii. Pharmacological
   iii. Regional
      1. Neuraxial
      2. Peripheral Nerve Blocks
V. Acute Postoperative Pain Management in Special Populations
   a. Pediatric
      i. Myths
      ii. Assessment
      iii. Special considerations
   b. Elderly
      i. Assessment
      ii. Special considerations
   c. Opioid Tolerant
      i. Underlying mechanisms
      ii. Special considerations
   d. Obese
      i. Special considerations
