This session invites attendees to consider the wide range of styles of processing information and ways to ‘think outside the box’—the difference between ‘intelligence’ and ‘being smart’! The evolution and maintenance of the hardware and software needed for creative thinking will also be explored. This information is helpful when problem solving as well as for facilitating group process.

Outline

I. Thinking
   a. Convergent
   b. Divergent
   b. Bivergent
