

J1-2 is a Cardiac/Vascular/Thoracic preop unit at the Cleveland Clinic that identified a need for an ambulatory post-operative recovery area due to prolonged operating room holds and post anesthesia care unit bed holds.

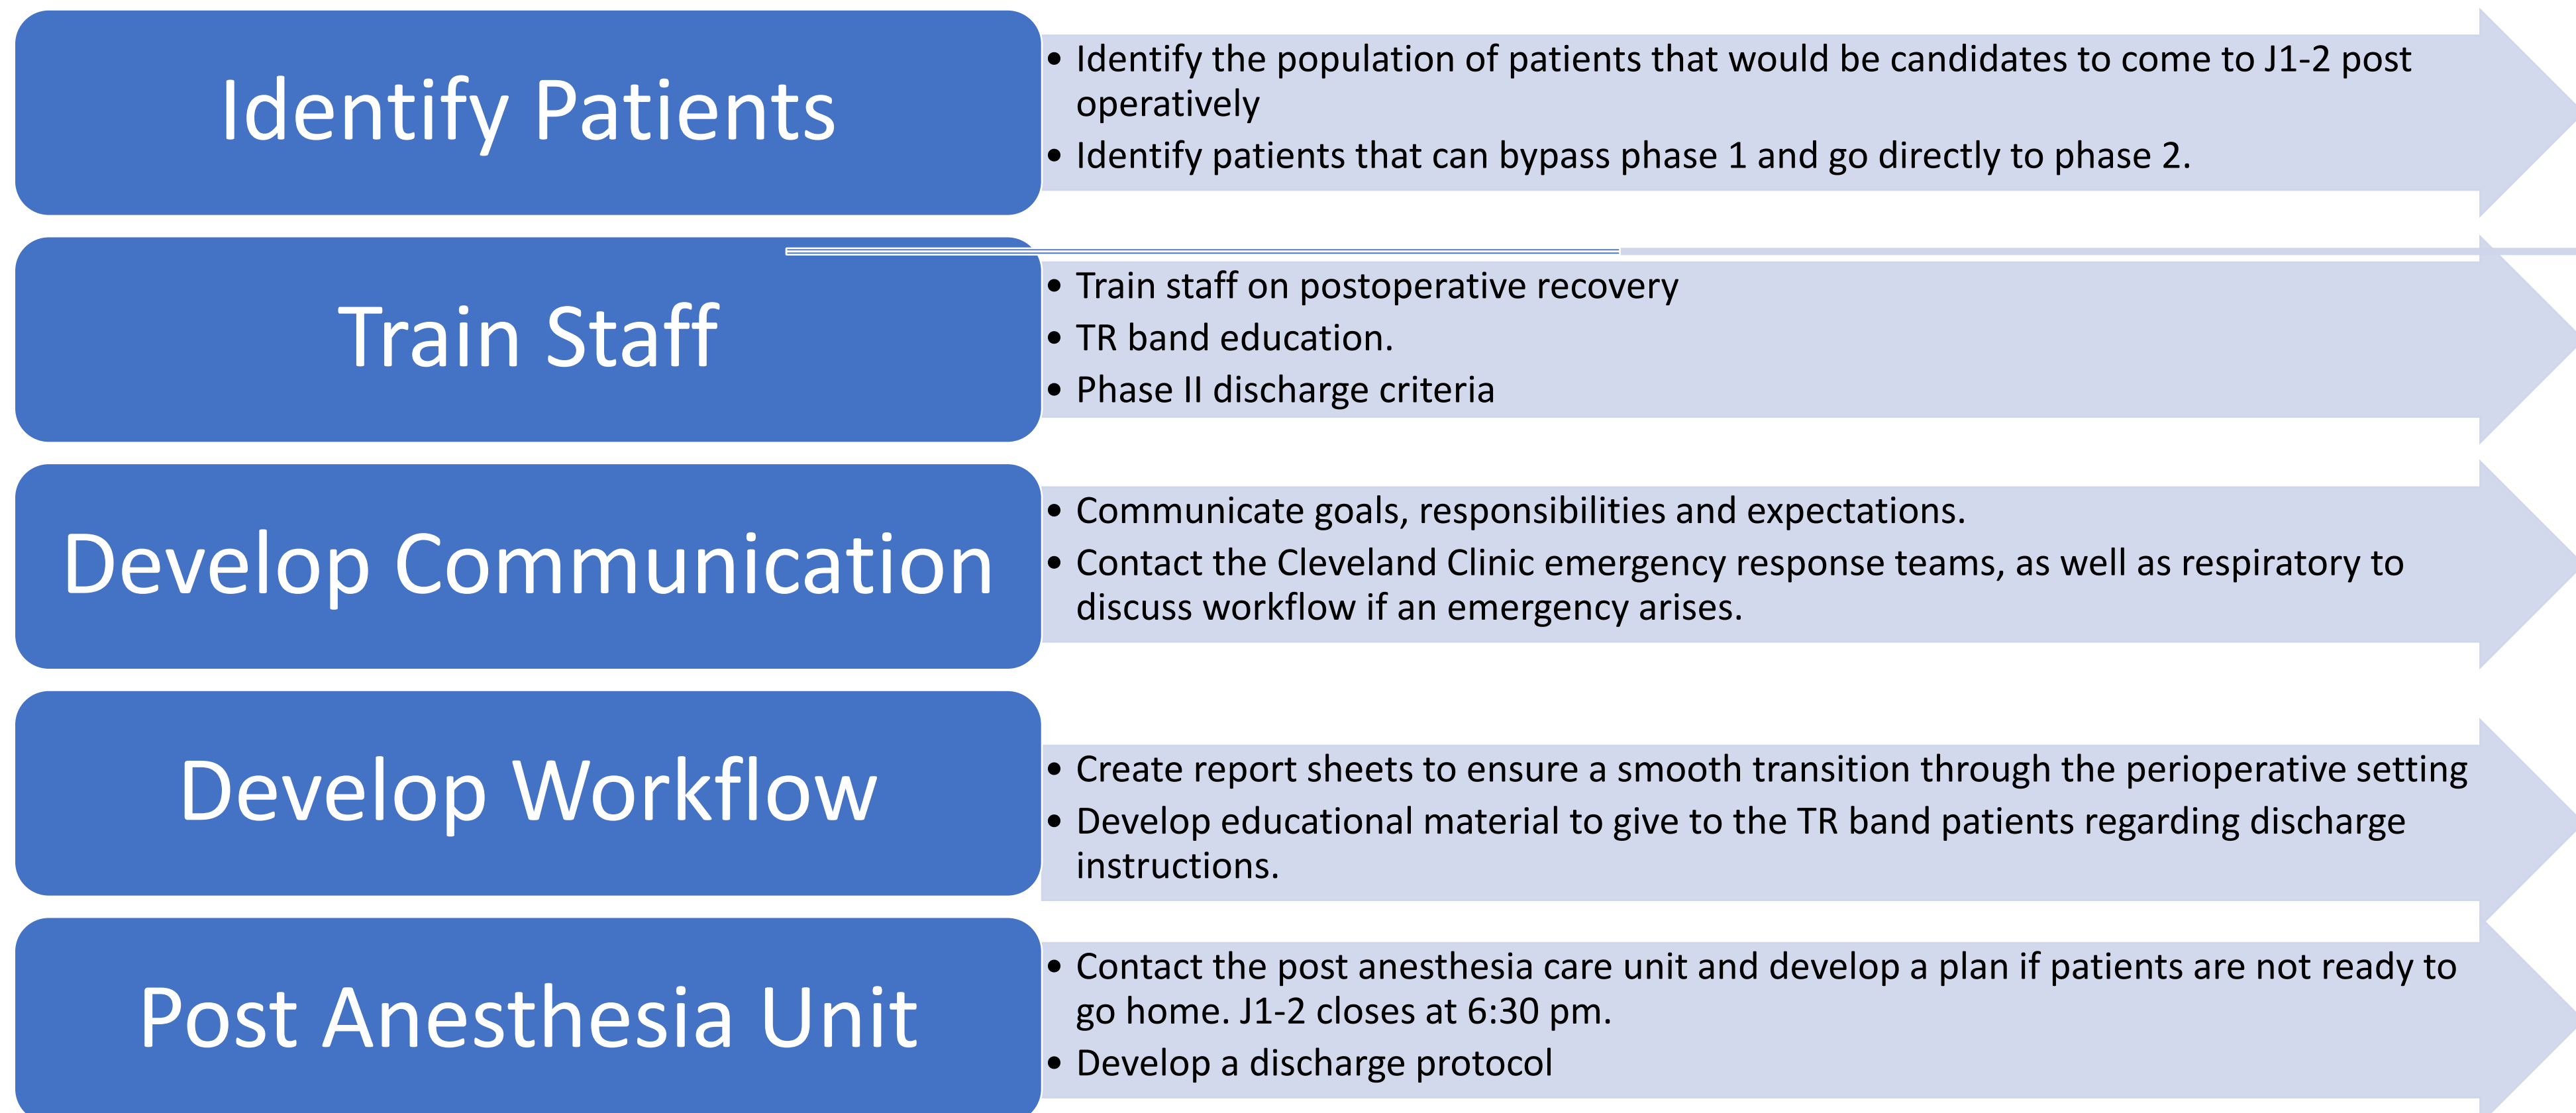

The impact of the operating room and post anesthesia care unit holds delayed surgeries, post anesthesia care unit backups, cancelled cases, and extended length of stays.

Objectives/Purpose

The goal is to optimize patient flow, minimizing surgical delays, and ensure timely postoperative bed availability.

Methods

Current Conditions

PACU Holds

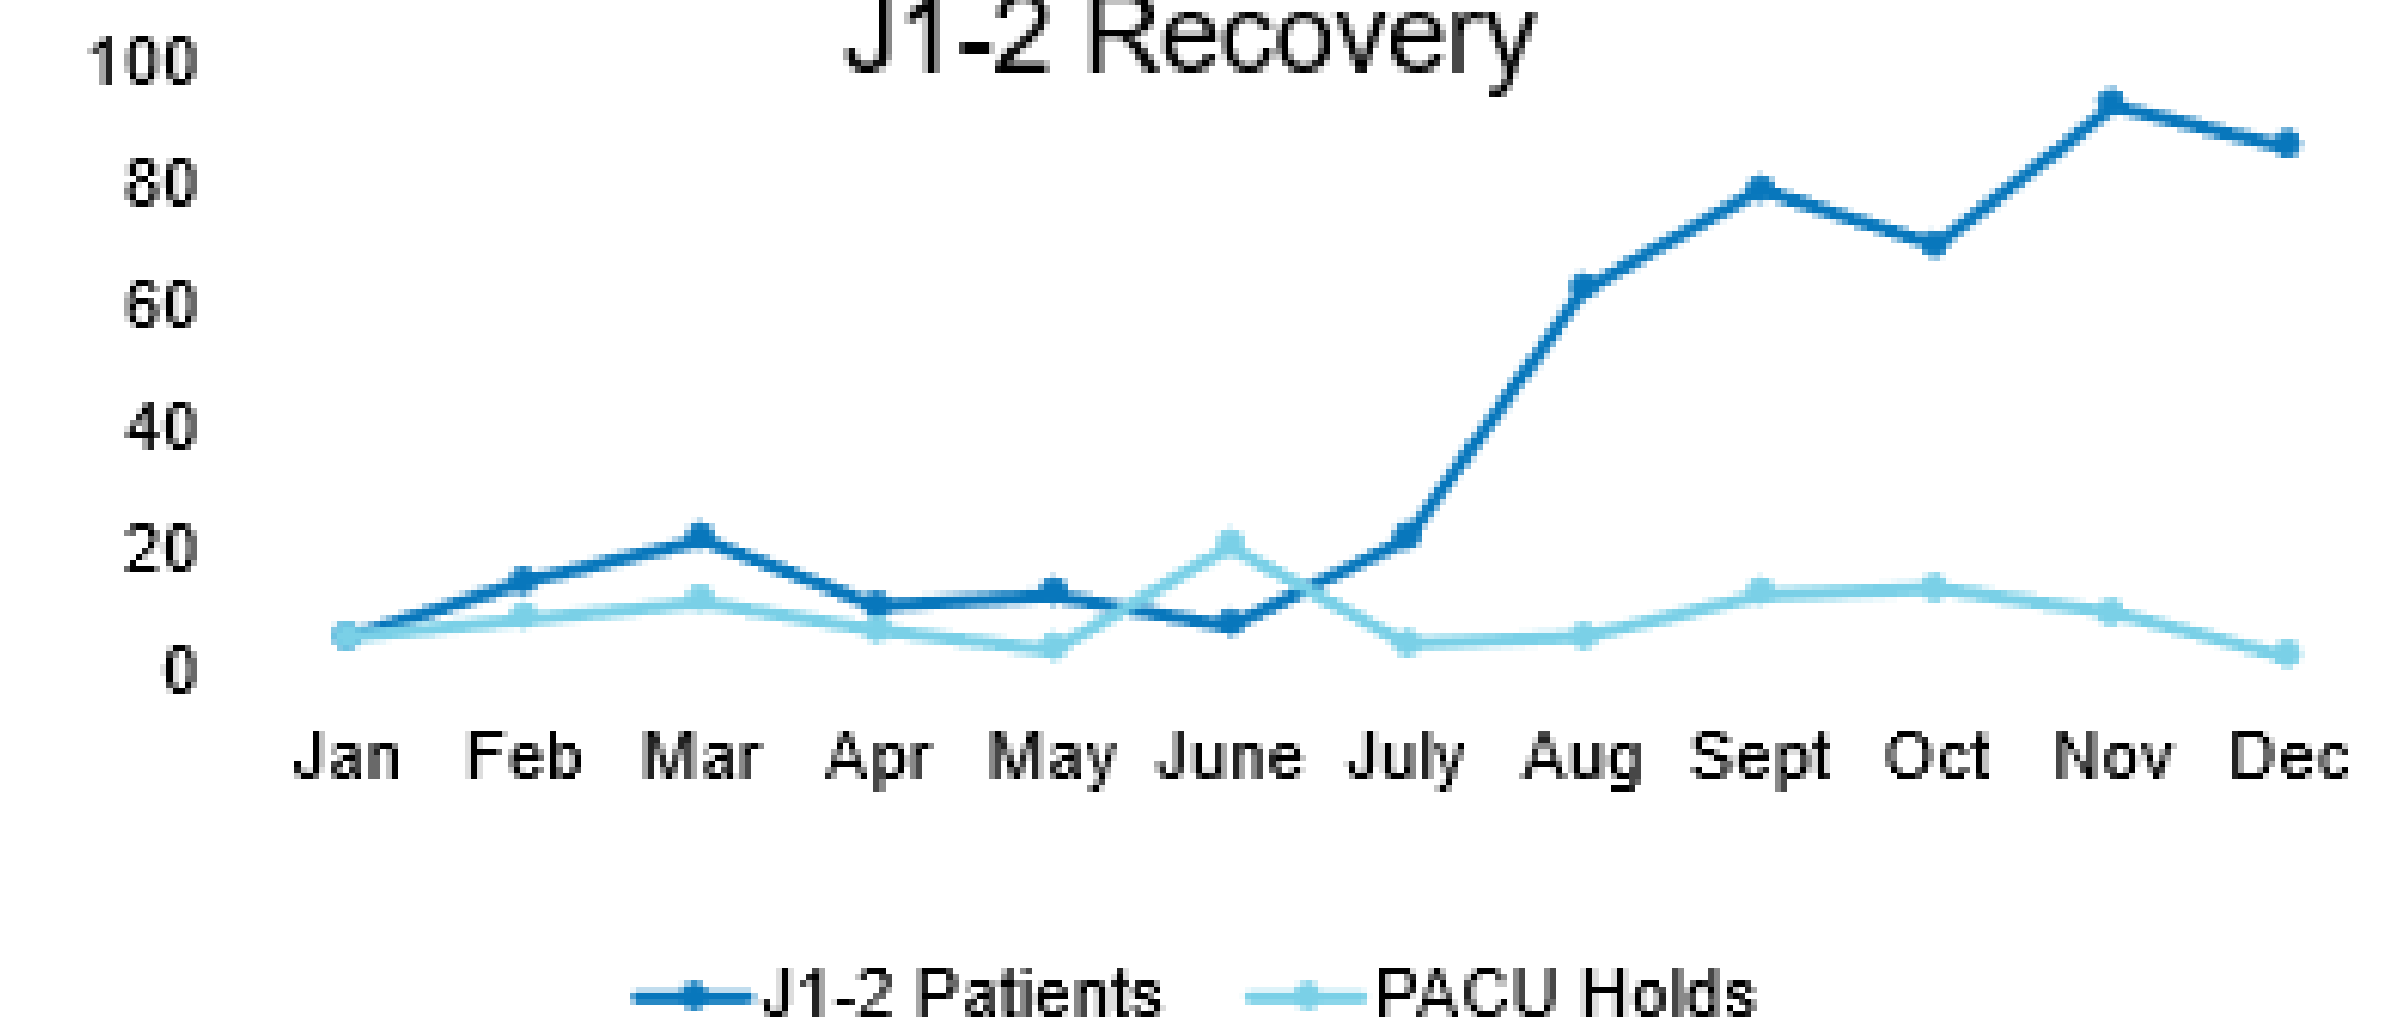

Conclusion

Since the implementation of the Ambulatory postoperative recovery area, we have been able to decrease hold times in the operating rooms, decrease the post anesthesia care unit backups, decrease the number of cancelled cases and decrease the length of stay.

Trend

J1-2 Recovery

Background

This is a template for a poster sized to 4 feet by 4 feet (48 inches by 48 inches). The headers (blue bands with type in white) are a starting point. The header type is Arial Bold, 44 pt. type size. They can be moved around, have different names for headers, can be deleted or more added as needed. The current size of the headers is the minimum recommended size.

This text box is also a starting point. The text is in Arial Regular and is at 27 pt. type size. This is the minimum recommended size for text.

The space between paragraphs can be flexible as space allows. You can enlarge type if you have the space. Please NOTE: whatever size of type you do end up using, please make it consistent throughout the whole poster. If there is a Reference List at end of poster, this can be in a smaller font. Recommend 14 pt. type size as smallest.
