

May 8, 2012

Thanks for the Scholarship for the ASPAN National Conference. I really learned greatly from what other institutions were doing for patients to promote their well-being and safety.

I went to the Pre Conference and the Post Conference, and attended many of the other offerings. It is good to know that so many hospitals are on board with the multimodal approach in the preop setting. I work mostly in the preop area, but also in PACU. We do a lot of Regional Blocks, so of course the Post Conference was very beneficial to me. The speakers were amazing and very informative.

I brought back a lot of material to share with my peers and am still sorting through it. I will be presenting a summary of all the offerings in my institution's *Pearls Of Wisdom*. This is how we share with others what we learn when we go to Seminars. This was my second ASPAN Conference, and it was a great experience and I encourage my peers to go to a Conference in the future.

I also shared with them your generosity for having a Scholarship to help nurses achieve their goal to attend an ASPAN Conference. Thanks so much for making this possible for me.

Mary Cummins, RN, CPAN, CAPA
